Emergency Shout Down Syestem with Remote Control Kill line Actuator —

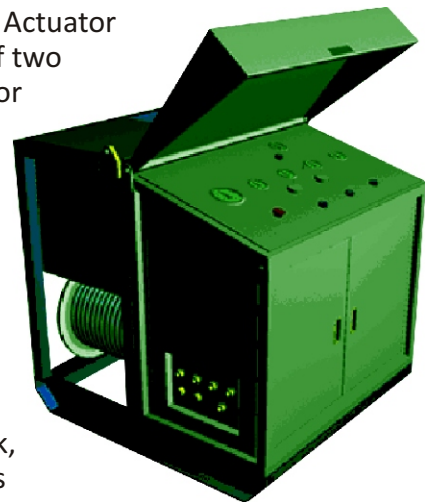

Description

The Emergency Shut Down System with remote control kill-line Actuator well test emergency shut down system allows remote closing of two valves fitted with an hydraulic actuator. The system is suitable for closing simultaneously two actuators:

- One flowhead kill line actuator
- One flowhead flow line actuator
- And one SSV equipped with hydraulic actuators
- Or any single action fail safe hydraulic actuator, provided hydraulic operating pressure is less than 6000 psi

ESD-CB includes:

- ESD control console including air driven pump, hydraulic tank, storage reels with air hoses and hydraulic hoses for actuators
- 4 ESD stations
- One Hi-Lo pressure pilot (5 000/10 000 psi, 200/750 psi)
- One Hi-Lo pressure pilot (5 000/3 000 psi, 50/40 psi)
- 3 extra ports for additional, optional pilots

Crtifications

Design	N/A
Manufacturing	Certificate of Conformity
Documentation	Quality File and load test

Accessories (Optional)

Other pressure range of pilots available on request

Weight and Dimentions:

Foot print	0.92 m x 0.92 m
Height	1.2 m
Weight	360 kg
