

MESSAGE FROM THE CEO

Welcome to the latest edition of the ETS newsletter. Although this is being published after a long gap, we have many new achievements and news to share. Since the last newsletter, we have inaugurated the second story of our office in Islamabad, managed to secure new contracts in Pakistan and the Kurdistan Region of Iraq and expanded the company's asset base with cutting edge technological equipment acquisitions. We are thankful to Allah for everything which He has bestowed upon us, to our clients who have given us the opportunity to provide services to them and to our team of professionals for their dedication and hardwork in providing excellent Service Quality in a Safe, Efficient and Environmentally friendly manner. I would like to wish you all a blessed holy month of Ramadan

FIRST EVER HP SEPARATOR IN PAKISTAN

In Pakistan production testing is carried out using conventional 1440 PSI separator and implementing zero flaring concepts. There are certain limitations associated with the conventional 1440 PSI separators available in Pakistan. Eastern Testing Service (Private) Limited came with a solution to the limitations and introduced the first ever High Pressure (HP) Separator in Pakistan. This Separator has overcome all the limitations due to its high design pressure of 2160 PSI and high gas and oil flow rate capacity which in 90 MMSCFD and 13000 BPD respectively.

ETS has introduced the 2160 PSI HP Separator first time in Pakistan

Upon arrival in Pakistan, the HP Separator was successfully used on 9 wells in North of Pakistan
